

# Replacement Planting List

Trees and vegetation contribute to local amenity and help make our urban environment liveable by ameliorating climatic extremes, improving air quality, providing habitat, reducing erosion and salinity.

This list has been compiled to assist with the selection of replacement trees to plant within your property as part of the conditions of your permit. The list provides an indicative species palette suitable for planting in private property within Ku-ring-gai Council. This list is not limited to those recorded and if an alternative species is identified, the species must be suitable for the intended location and be approved by a Tree Management Officer.
