

The benefits of local recycling

New South Wales

Visy is a leader in the recycling industry, recovering business and household recyclables from across Australia and New Zealand. This material is processed and re-manufactured back into sustainable packaging.

We support local manufacturing and contribute to minimising landfill, continually innovating and looking for new ways to recover as much recyclable material as possible.

Our recycling operations in NSW

Material recovery facility: Smithfield and Taren Point

Cardboard and paper recycling: Smithfield and Alexandria

Glass recycling: Penrith

Transport station: Taren Point, Alexandria and Wollongong

Our recycling operations are part of a local industry directly supporting

>1,620 jobs across New South Wales

plus a network of subcontractors[^]

For more information contact us on **13 VISY (13 8479)** or visit [visy.com](https://www.visy.com)

*Estimated total percentage of all material processed from kerbside recycling, at all Visy NSW material recovery facilities, YTD as of April 2023.

Recycling-remade

Visy's unique closed loop systems are helping turn your recyclable materials back into resources, across Australia and New Zealand powering a circular economy.

Each year we receive, sort and process*:

Paper and Cardboard

Our pulp and paper activities are the engine behind our circular economy as we convert recovered **paper and cardboard** into high quality pulp and paper for packaging, as well as energy for our own plants.

We take

1.27M

tonnes of paper and cardboard

We make

813,000

tonnes of recycled paper

928,000

tonnes of cardboard packaging

Glass Bottles and Jars

We are the largest manufacturer of **glass bottles and jars** in Australia and New Zealand. Our aim is to increase the recycled glass content in the re manufacture of every new container on average to 70%.

We take

512,000

tonnes of glass

We make

814,000

tonnes of glass bottles and jars

Plastics

Our expanding circular economy capabilities are focused on diverting **plastics** from landfill or export, to maximise rPET and rHDPE recovery for use in our own re manufacturing operations.

We take

92,000

tonnes of PET, HDPE and other plastic

We make

2B

plastic containers and preforms

Beverage Cans

Our aluminium **beverage cans** are recyclable and able to be recovered, re-processed and re-manufactured, supporting the circular economy.

We take

17,800

tonnes of aluminium

We make

2.4B

beverage cans

Steel Food Cans

Our **steel food cans** are recyclable, allowing us to offer inter connected sustainable packaging and resource recovery solutions for the Australian and New Zealand food industries.

We take

24,600

tonnes of steel

We make

547M

steel food cans
